Chennai, Tamil Nadu | +91 9092656379 | nivedha.since2004@gmail.com

About Me:

Aspiring Python Developer with strong Knowledge of Python programming, web development, databases and problem-solving. I am hardworking, adaptable and quickly learner who enjoys working both independently and as part of a team. Eager to continuously learn new technologies, expand my knowledge and enhance my technical skills, I seek an opportunity to contribute to software development projects while striving for excellent in every task and responsibility.

Education:

Graduation: B.E. Electronics and Communication Engineering **2022-2026**
T.J. Institute of Technology, Chennai.

HCS : Tamil Nadu Board (Computer science) **2022**
With 70.6%

SSLC : Tamil Nadu Board **2020**
With 68.4%

Skills & abilities:

- Python full stack developer: Frontend - Web Technology; Backend - Python & Django; Database - SQL.
- IOT and Embedded system.
- Typewriting – Qualified with First class.

Projects:

Cost Effective Air Quality Surveillance Using AI **2026**

- Developed an AI-powered air quality monitoring system using low-cost sensors, IoT, and machine learning to detect pollutants, provide real-time analysis, predict pollution levels, and display live data on a web dashboard.

Smart waste Management system (IoT) – Mini Project

- Developed a sensor-based smart waste management system using ultrasonic sensors, Arduino, and cloud analytics for real-time bin monitoring and collector alerts.

Workshop:

- I have completed a workshop under Dvein Innovation Private Limited on AI & ML, Data analytics and Block chain. (Certificated)
- I have completed a workshop under Techknots Academy LLP on Internet of Things and Home Automation. (Certificated)

Known Language:

- English.
- Tamil.
